

ARDEN

The idea of making the **Q.2 model** was, so to say, pushed upon **Arden** by the new technical and aesthetic requirements of the motorists.

In these steering wheels, the classical wood sheathing is replaced by leather. For the **Q2 wheel**, **Arden** have devised a soft grip, ensuring for a firm contact between fingers and wheel. This remarkable result has been achieved by **Arden** through padding the wheel with flexible, and at the same time, dense material, to which the calfskin sheathing is applied.

It is therefore suitable to meet the requirements of the motorist who wants a classically styled sports-type steering wheel, as well as those of the driver who wants it of an essentially racing-style look.

INTERCHANGEABLE BOSSES
AVAILABLE IN 13" and 15" LEATHER
and WOOD

British Manufacture
